Education

University of British Columbia September 2021 – May 2026
Bachelor of Science majoring in Computer Science *Vancouver, Canada*

Experience

Software Application Developer Intern May 2025 – August 2025
Workday, Inc. *Vancouver, Canada*

- Engineered automated batch data pipelines using internal distributed framework to monitor product performance across 8+ million job executions.
- Remediated UI accessibility defects to enforce VPAT/WCAG compliance, refactoring core front-end components for screen-reader compatibility.
- Ensured consistency and customization in the product by tokenizing labels and writing comprehensive unit tests, contributing to the sprint cycles of two Scrum Teams within an Agile environment.

Front-End Web Developer Intern September 2023 – August 2024
Samsung R&D Canada *Vancouver, Canada*

- Enhanced the automated test framework by developing robust Cypress integration tests, reducing test times by over 70% (from ∼50 minutes to ∼15 minutes).
- Led the development of a new dynamic carousel dashboard tile, serving as the primary liaison between product management, UX design, and engineering, to deliver a feature that effectively notified users of device anomalies.
- Reviewed 100+ pull requests and resolved 40+ critical production bugs/tickets for Samsung KAI, ensuring system stability across release cycles.

Projects

trashPanda | *Java, PostgreSQL, REST APIs* March 2025

- Engineered a full-stack food-sharing platform in 24-hours as part of youCode Hackathon, leveraging RESTful APIs for user authentication and ingredient exchange to combat local food waste.
- Designed and normalized PostgreSQL database schemas with SQL queries, optimizing data retrieval performance.

Public Poems | *Node.js, Express, OracleDB, REST APIs* December 2024

- Co-developed a full-stack poem-sharing web application using Node.js and Express.
- Built and deployed key user features including account registration, login, and community-building functionalities to drive user engagement via RESTful APIs.
- Designed and implemented a normalized relational database schema in an Oracle Database, enforcing data integrity constraints across 5 core entities and 14 total tables.

Stats With Class! | *React, Express, TypeScript, Mocha/Chai* December 2024

- Developed a full-stack, test-driven course analysis application using React and a scalable Express REST API.
- Wrote 150+ tests using the Mocha testing framework and Chai assertions to ensure reliable functionality.
- Engineered an asynchronous file-processing pipeline to parse, validate, and convert bulk ZIP/HTML course databases into structured JSON models.

Music Unbounded | *TypeScript, HTML/CSS, Figma* November 2022 – August 2023

- Co-developed a responsive web application connecting children with music tutors, ensuring seamless cross-browser compatibility and optimizing layout rendering across devices.
- Designed interactive, high-fidelity Figma prototypes from user requirements, establishing design system components and streamlining developer handoff.

Colour Love | *React, Redux, MySQL, Vite* January 2023

- Designed a responsive CRUD application using Vite and React to generate randomized and custom color palettes.
- Implemented Redux for client-side state management, centralizing user authentication flows and user session data across the application.
- Engineered a MySQL database architecture to manage user authentication and optimize storage, retrieval, and indexing for custom color palettes.

Post-That | *Next.js, Tailwind CSS, styled-components, Figma* January 2023

- Led a 4-person team to develop a web application for sending virtual postcards during the nwHacks Hackathon.
- Designed UI specifications in Figma and engineered reusable frontend components using Next.js, Tailwind CSS, and styled-components.

Cutesy Cards | *Java, Java Swing, JUnit, JSON* July 2022

- Designed and developed an interactive flashcard app enabling users to create, edit, star, save, and load flashcard decks for efficient memorization by serializing data into JSON files.
- Implemented the Model-View-Controller (MVC) architecture to enhance scalability and maintainability, leveraging the Java Swing library to build a visually engaging and responsive user interface.
- Employed JUnit testing to ensure reliable functionality and user experience.

Technical Skills

Languages: TypeScript, JavaScript, SQL, Java, Python, HTML/CSS
Frameworks & Libraries: React, Next.js, Node.js, Express, Redux, Tailwind CSS, styled-components
Testing & Tools: PostgreSQL, MySQL, REST APIs, Cypress, Mocha, JUnit, Git, Figma, Jira, pandas, scikit-learn
